

Smart City Works brings Northern Virginia Smart Region Initiative to South-by-Southwest.

Our goal is to encourage economic partnerships and development in our region.

Our partner, [European American Enterprise Council \(EAEC\)](#), will support featured Northern Virginia companies in targeting and connecting with dozens of potential clients, partners, and investors. By providing expert preparation guidance and matchmaking support, we hope to create lasting investment relations in the region.

Connect with EAEC and the seven featured companies that are participating under our regional booth!
